Mybootee Babee Beanie

This beanie fits newborn to six months with a head circumference of up to 16 inches.

Gauge: 8 sts = 1 inch, 8 rows = 1 inch

US size 5 Double Pointed needles required. (1 Addi Turbo 16 inch circular needle is also very helpful if you have used them before, but I would not recommend them for a new knitter.)

Note: This pattern has been tested with approximately 50 yards of sport weight and DK weight yarns. Since each yarn is unique, it is strongly recommended that you knit a swatch and make sure it is the proper gauge. Your gauge may also depend on how tightly you knit. If you are a tight knitter you may need to use a larger gauge needle and if you are a loose knitter, you may need to use a smaller gauge needle.
